

# EOR Draft in 48 Hours

Transform weeks of manual reporting into 2 days of automated precision

No New CapEx

Full Provenance

Software-First

## ≤48h Turnaround

From survey drop to complete draft with figures & tables

## Auditable Trail

Click any figure to see source files, QC rules & transforms

## Your Data, Secure

Runs in your tenant or isolated enclave, read-only access

## Three Clicks to Your Monthly Draft

1

### Ingest & QC

Auto-align units, timebases  
Flag gaps & drift

2

### Change Cards

Surface movement, pressure  
Volume deltas with TARPs

3

### Generate Draft

Word/PDF in your template  
Figures, CSV, provenance

## 30-Day Pilot Program

Binary acceptance: Pass/Fail with money-back guarantee

### Timeline:

- **Week 0:** Shadow Draft in 7 days
- **Days 8-30:** Two live Draft-in-48
- **Success:** Fee credits to Year 1

### Success Criteria:

- ✓ Two ≤48h drafts delivered
- ✓ ≥2 data feeds integrated live
- ✓ ≤10 EOR edits to finalize
- ✓ ≥1 novel actionable finding

## Critical Incidents: Why Speed Matters

### Brumadinho 2019

Weeks of precursory deformation in satellite—  
detected too late

### Cadia 2018

Months of acceleration before failure—monitoring  
gap

### Your TSF

Don't wait 3+ weeks for insights that matter today

## Quantified ROI: Make the Business Case

**75-90%**

Cycle Time Reduction

**30-60%**

Labor Hour Savings

**\$0 CapEx**

Day 1 Investment

### Data We Ingest (No Reformatting)

- Piezometer time series (VWP, standpipe)
- GNSS/RTK monument positions
- Drone orthos, DSM, point clouds
- Bathymetry survey points
- InSAR feeds (optional Q2)
- Weather station data
- Seepage flow rates

### What Makes Us Different

- EOR-ready output in their template
- Provenance chain for every number
- No vendor lock-in on sensors
- Read-only collectors (no control risk)
- Platform learns from your edits
- Multi-TSF scale discounts
- Weekly fusion briefs (optional)

Metric	Traditional	With Stellatus	Impact
<b>Draft Time</b>	8-20 days	≤48 hours	10x faster
<b>Manual Work</b>	40-80 hrs/month	2-4 hrs review	95% reduction
<b>Contractor</b>	Critical blocker	Removed	Zero backlog
<b>Anomaly Detection</b>	Visual inspection	Automated	24/7 coverage

### Deployment Options

- **Your Cloud:** Full control, your IAM
- **Ring-Fenced:** Isolated, SOC2 Type II
- **Hybrid:** Edge + cloud analytics
- **Air-Gapped:** On-premise (Q3)

### Expansion Roadmap

- **Q2:** Multibeam bathy, InSAR
- **Q2:** Weekly fusion briefs
- **Q3:** Fiber-optic pilots
- **Q3:** TARP automation

### Addressing Common Concerns

#### Q: "Our EOR won't trust third-party analytics"

A: This is their draft in their template—we just accelerate it.

#### Q: "We already have monitoring software"

A: Great—we integrate with it. Our value is the 48h draft.

#### Q: "What about liability?"

A: Decision-support only. Contracts cap exposure.

#### Q: "How do you handle bad data?"

A: Auto-QC flags gaps, drift, outliers. You review.
